## Nostalgia in a new light

Modera is a tribute to timeless design. We wanted to capture the warmth and clarity of mid-century forms, always leading with quality and innovation. It's lighting that feels both nostalgic and completely new.

——— Rebecca Barker, Amphis product manager

## Design & materiality

Mid-century modern was never just a trend - it was a movement. An era that celebrated simplicity and championed quality. A time when life felt calmer and more connected. Modera captures that spirit. It's lighting that feels familiar, like gathering around the table, sharing stories, switching on the glow that makes a house feel like home. Equal parts nostalgia and modernity, each piece is LED-integrated, dimmable and engineered with care. Let Modera take you back, while lighting the way forward.

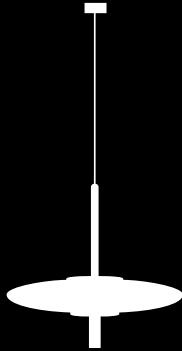

Modera embraces simplicity. No excess, no fuss. Just form and function in harmony. At its heart is glass: the hero of the collection. Tempered for strength, frosted to soften, fluted to add rhythm and texture. Hand-blown pieces honour traditional techniques and the beauty of craftsmanship. Each finish plays with light in its own way, casting subtle shadows and a welcoming radiance. Metal fixings are minimal, keeping the focus on clean shapes and strong silhouettes. Like all good design, it feels as good as it looks.

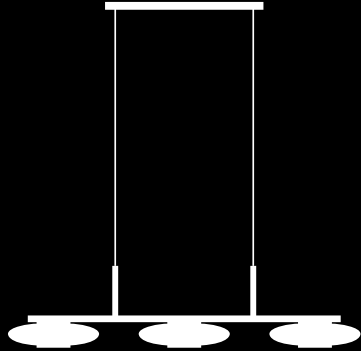

The Modera collection

Modera brings together pendants, wall lamps and linear fittings, unified by their sculptural forms and material integrity. Ellipsoid glass shades that hover like interstellar objects, softly diffusing light through frosted and tinted finishes. Fluted glass columns bring texture and rhythm. Compact wall lamps add playful punctuation with a retro edge. Each piece balances refined metal detailing with luminous glass, offering a curated mix of sizes and styles designed to work in harmony. Use them as standalone statements or layer together in a lighting scheme.

# UFOs

Reimagine your retro sci-fi dreams in hand-blown glass and timeless forms. Each UFO piece features a softly glowing, symmetrical silhouette that appears to hover in space - casting gentle light and evoking calm and curiosity.

## UFO

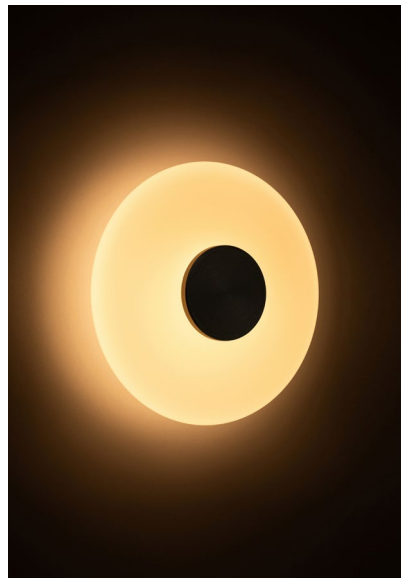

A milky-white disc drifts into view. Its flying-saucer shape is both recognisable and intriguingly unexpected. Fully illuminated and radiating from within, a secondary LED beams light downward from its base stem. Suspend at varying heights to change the circle of brightness below.

## UFO Wall Lamp

A celestial glass body tethered to the wall by a metal force. Crafted from a single piece of glass, it casts a mellow, moonlit glow. Let UFO Wall Lamp set the mood like a much-loved vinyl.

## UFO Linear

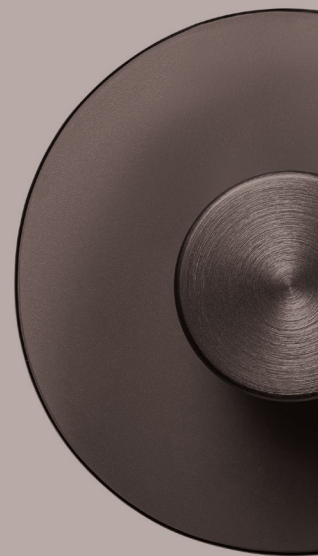

Three dusky planets in perfect alignment, bonded by metal. The UFO Linear pendant evokes the mood of mid-century lounges - atmospheric, architectural and quietly commanding above dining or kitchen spaces.

# Eclipses

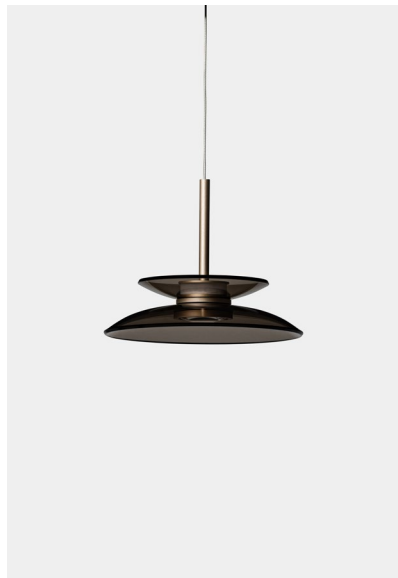

Each Eclipse piece features overlapping discs, capturing glass and metal in perfect alignment. Atomic-age forms are reimagined for cosy corners and moody dinners in the 21st century.

## Eclipse

Twin lenses glow from a central light source, while a second beams downward, shining over everything in orbit. Rich coffee-coloured glass is paired with brushed bronze in a modern take on a classic palette.

### Eclipse 230 Wall Lamp

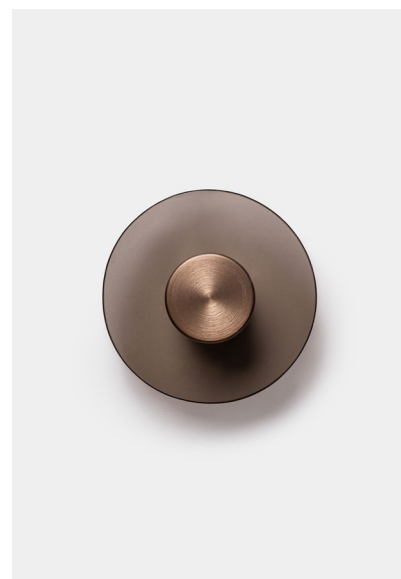

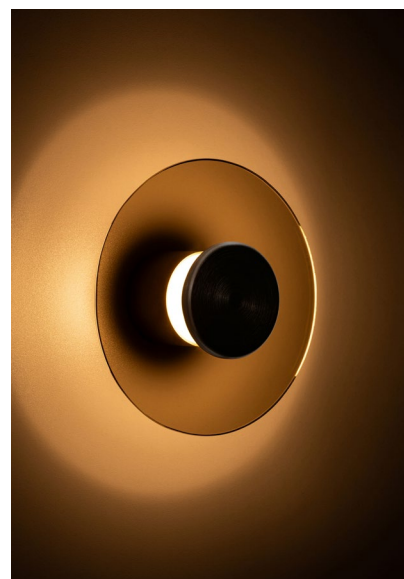

The perfectly circular Eclipse 230 Wall Lamp casts a cosmic halo. Smoky glass sets the tone for low-lit lounges and late-night conversation.

## Eclipse 150 Wall Lamp

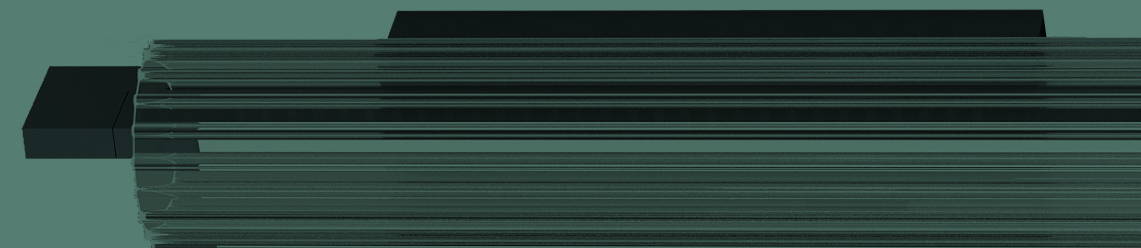

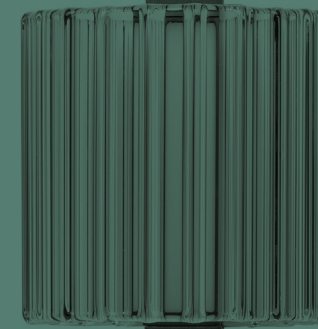

Amber glass surrounds a brushed bronze pupil, reminiscent of a golden eye. Eclipse 150 Wall Lamp offers a warm, watchful ring of light, enriching snug spaces.

# Columns

Linear striations in the glass bend light with subtle movement and finesse - sculptural by day, luminous by night. Brushed nickel hardware contrasts and grounds the delicacy of the glass. Decadence, activated.

## Column

Elongated and elegant, Column floats with quiet luxury. A luminescent fluted pillar is anchored by a sleek nickel line, enhancing the illusion of weightlessness.

## Column 500 Wall Lamp

Mounted vertically or horizontally, the Column 500 Wall Lamp brings rhythm and refinement to any setting. After dark, appreciate a patterned glow spilling across surrounding surfaces.

## Column 250 Wall Lamp

Compact but impactful, the Column 250 Wall Lamp is perfect for layering in intimate spaces. Textured glass channels invite you to dim the lights and settle in.

## Puddles

A playful trio with personality. Puddle wall lamps bring soft curves, smooth finishes and a splash of spirit to your walls. Their compact shape and radiant rings create immediate impact - perfect for hallways, bedrooms or beside a mirror. Stack them, pair them or let them shine solo.

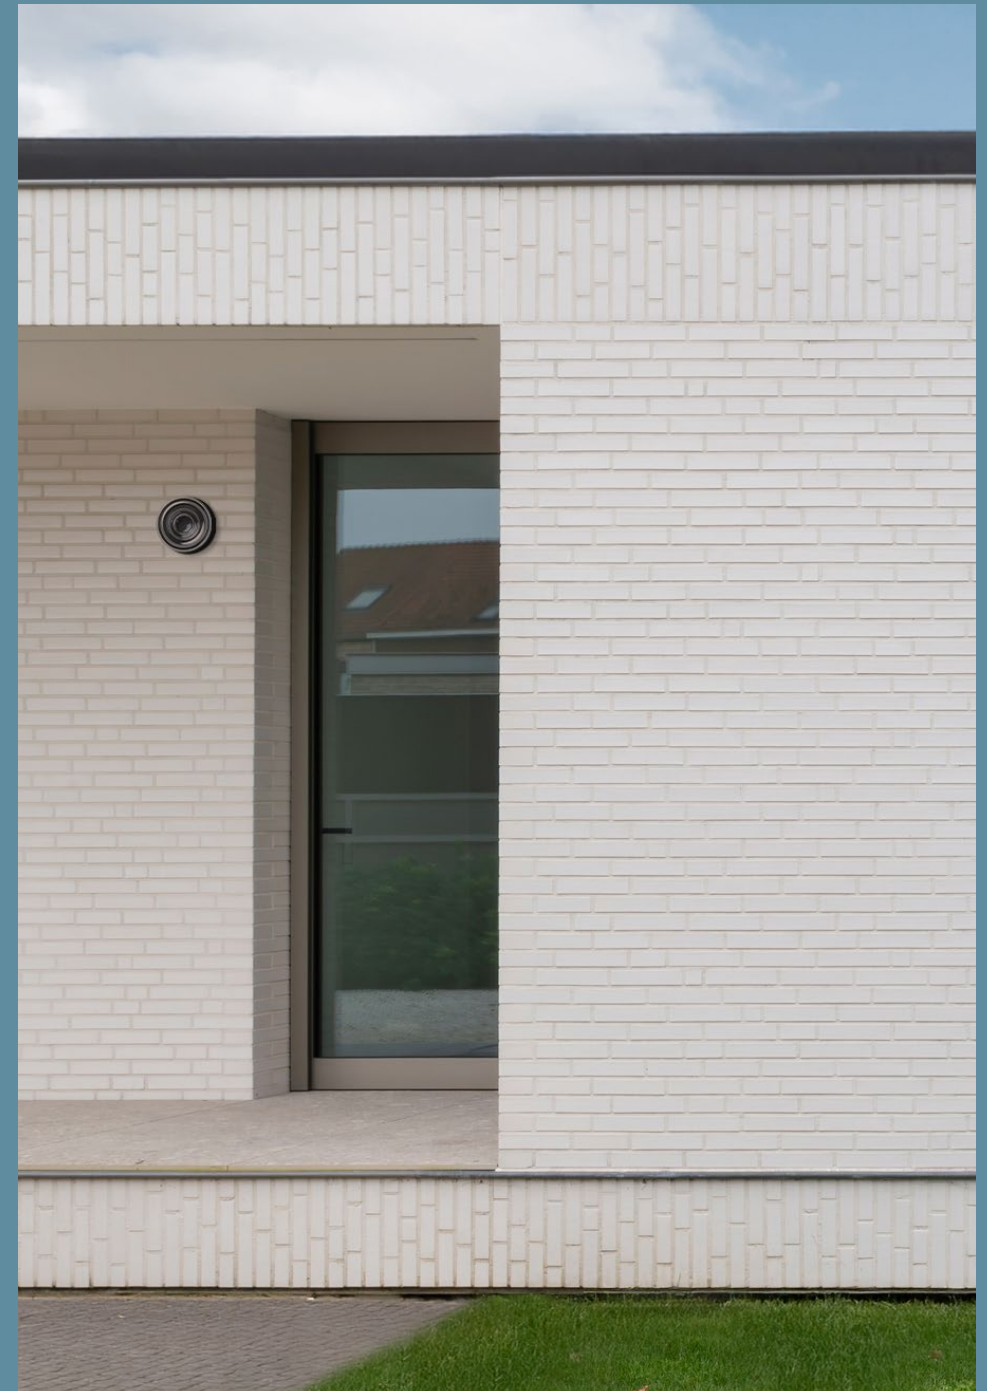

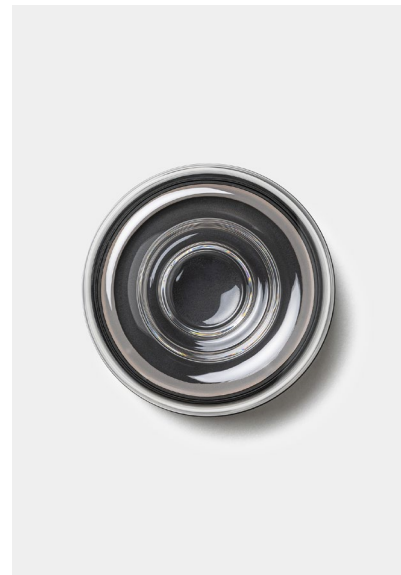

## White

Less is more with Puddle in white.  
A pared-back palette and diffused glow  
offer effortless brightness and balance.

## Black

Make a ripple with Puddle in black - bold, grounding and luminous. Use them to add drama to monochrome interiors or anchor colour-rich interiors.

## Satin Gold

Warm and refined, with a retro nod. The Puddle wall lamp in satin gold adds tasteful glamour with its polish and sprinkle of shimmer.
